

Fangor Bollo vision

FOR IOS DEVICE

To mirror an iOS device

Turn the project on

Click on iOS cast on the project screen

Search for the projector AP and connect on your device WiFi

Then open your control centre of your iOS device and click mirroring and then click on the ZY cast

FOR ANDROID PHONES

Turn on projector and select miracast

Open the wireless display function on your android device, for Samsung this is call smart view.

Select this projector ZYCast-0549.

You can then stream from your phone.

You can then stream live video around the lodge and play games on your device whilst watching them in multi colour Bollo Vision.
